May 22, 2021 Training Material

Construction Ethics:

Definition: Ethics are moral principles that govern a person's behavior or the conducting of an activity.

- Ethical behavior impacts the degree of trustworthiness and integrity of companies, along with the way they conduct business.
- Ethics of construction companies impact their ability to acquire and maintain clients.

Site Engineer Ethics:

1. Loyalty to the company.
2. Keeping a friendly relationship with the site neighborhood.
3. Professionalism in dealing with team mates and contractor staff.
4. Commitment to Owner's protocols.
5. Documentation of any verbal instructions on site.
6. Resolving problems.
7. Reporting any errors happening on site to RE and project manager. The main office should be informed through "WhatsApp" groups.

SKEP-III

Site staff and fresh graduate engineers participating in the training

Eng Whaib spoke about construction ethics during the training session
